

THE PADUCAH DAILY SUN.

Published every afternoon, except Sunday, by

THE SUN PUBLISHING COMPANY.

INCORPORATED.
P. M. FISHER, PRESIDENT AND MANAGER
J. R. SMITH, VICE PRESIDENT
J. J. HARRIS, SECRETARY
W. F. JANTON, TREASURER

DIRECTORS:
P. M. Fisher, J. R. Smith, H. W. Clements, J. E. Williamson, J. J. Harris

THE DAILY SUN

Will give special attention to all local happenings of interest in Paducah and vicinity, not neglecting the general news, which will be given as fully as space will permit without regard to expense.

THE WEEKLY SUN

Is devoted to the interests of our country, and will at all times be new and interesting, while keeping the reader posted on all political affairs and topics, while it will be a leisure and pleasant exponent of the doctrine and teachings of the National Republican party.

CORRESPONDENCE.

A special feature of the weekly edition of THE SUN will be the Correspondence Department, in which it hopes to receive every locality within the limits of its circulation.

ADVERTISING.

Rates of advertising will be made known on application.

Office, Standard Block, 115 North Fourth street.

ANNOUNCEMENT.

Commonwealth's Attorney.

San Houston is a candidate for the office of Commonwealth's Attorney for the Second Judicial district containing the counties of Marshall and counties at the November election.

First important business barometer, the bank clearings of the country, continues to indicate early and certainly business prosperity. The total September clearings at seventy-eight cities are quoted by Bradstreet as \$5,521,333,332, a gain of nearly fifteen per cent. over August, 1897, and fifty per cent. smaller than that of the highest month on record, December, 1892.

Another fall in silver is recorded from the financial centers in this country and Europe. During the closing week in September the price of silver bars dropped from 57 1/2 cents per ounce to 54 cents, in New York. A money metal which would fluctuate three and a half per cent. in value in a single week can scarcely commend itself to the average voter as a safe one for adoption by a single nation without, at least, the co-operation of other countries to sustain its value.

The Philadelphia "Press" has made a careful canvass of the state of Pennsylvania, sending out 102 inquiries into the 67 counties of the state relative to the business and industrial conditions. The result is most gratifying and the reports unanimously to the effect that times have greatly improved, factories started up all over the State, orders are coming in and labor finding employment everywhere.

Is the Democratic party preparing to combine the single tax with free silver in its next declaration of principles? With Henry George's candidacy in New York and Tom Johnson's Senatorial fight in Ohio, both on the silver and single tax basis, coupled with the publication of the silver-trust organ, the "Arena," on

this subject, it looks that way. How do the farmers like the idea of saddling all the taxes upon the land owners exclusively?

SPEAKING OF RECORDS—of course the record of the present council does not loom up like that of preceding councils in all respects. As for example, in the line of building wharfs. While the present council has done a good deal in the way of public improvements, it has not expended thirty-six thousand dollars on a wharf that every teamster in town is afraid of. That remarkable piece of financial management and of misit engineering, which ought to be called "Yeiser's Folly," is a constant reminder of the beauties of Democratic municipal management in Paducah.

The following from the Williams-town (Ky.) "Courier," is referred to those Democrats who affect to believe that the silver question is not an issue in this campaign:

"The free coinage of silver at the ratio of sixteen to one is just as much an issue in the present campaign as it was last fall. Until silver is rehabilitated as a money metal and its coinage allowed at the mints of the United States on equal terms with gold, there will be no rest or waving in the free silver Democratic column. We are in this fight to win it in the end, and those who get in the way will get run over sooner or later."

The sixteen to one theory is an issue in this campaign, not because the clerk of the court of appeals will have anything to do with the solution of this great question, but simply because of the renewed vigor which a victory this fall would infuse into the free silver organization.

The A. P. A. manager of the Register squirms under the charge that he is an A. P. A., froths at the month and says all sorts of mean things. Let us see if he ought to be believed in his denials of the charge from what the people in general know of his record. It is well known that it is one of the obligations of the A. P. A.'s to deny belonging to the order as well as to refrain from discussing the order with outsiders; hence unquestionably he would deny his membership. The people also know that there were two ways to belong—one by active membership, another by affiliation, the latter was by a card signed, signifying ones sympathy with the order. The cards were for weak kneed brethren who from a fear of injuring their business, or other reasons did not participate in the meetings; this latter plan was adopted by many and may have been the way the manager of the Register affiliated. The majority of people remember that the manager was a bosom friend and associate of J. Howard Carpenter who became so notorious, that he was repudiated by numbers of the good people of his own church, and if he did not belong, he was in bad company. When J. Howard Carpenter and a few of his followers called a meeting at the City Hall and named themselves the leaders of the Democratic party, a number of Democrats who had announced themselves for various offices were told to step aside, that a faction might be arranged with the A. P. A. It is too fresh in the minds of the people to have been forgotten that James E. Wilhelm, Carpenter's bosom friend, was named as the A. P. A. candidate from the Second ward. J. Howard Carpenter was chairman of the committee on nominations, and in fact was the most active leader in the meeting which assumed to call itself the Democratic party of the city of Paducah, and which the self-respecting Democrats repudiated by majorities so large that he who ran may read. Mr. Wilhelm, the forty-dollar-a-month coal clerk, wanted to be a councilman and at that time never denied that he was the representative of the A. P. A. for he dared not, or he would have been beaten 800 instead of 500, as it was demonstrated that the 1500 votes claimed by the A. P. A.'s dwindled to 300 when the searchlight was turned on. This is not all; it has ceased to be a secret that Mr. Wilhelm severed his connection with an organization because a Catholic was elected to the highest office of the organization. If this does not verify the statement made by the Sts. that Mr. Wilhelm is an A. P. A., facts prove nothing. Whether he ever belonged to a local council or not, that action of his alone stamps him what he is. As in the "Register's" statement about cowardice displayed by an attack of the Sts., that was here as on his part. If he wants practical demonstration of how big a coward the Sts.'s writer is he will find us in from 7 a. m. to 6 p. m.

CAPT. FARLEY'S POSITION.

The height of the "Register's" idea of journalism seems to be personal, malicious slander. It is personal attacks upon Capt. Farley are beneath the notice of Capt. Farley himself or any reputable newspaper. Capt. Farley has been in business here for a generation; his excellent reputation as a business man and his

high standing as a citizen are too well known by all the people of Paducah to be injured in the slightest degree by the false and malicious statements of the "Register." The narrow-mindedness and the venomous disposition of the manager of the "Register" are also well known by those people who have ever had anything to do with him that, with all such persons, the "Register's" attacks on Capt. Farley are as much falling on a duck's back.

The Sts. does not think it necessary personally to abuse the Democratic candidates in order to convey to the people the fact that we are supporting the Republican ticket. We believe that Mr. Farley would make a better mayor than Mr. Lang, but we do not think it necessary to attempt to prove that Mr. Lang is anything less than an honorable gentleman and an upright citizen.

Capt. Farley is asking for a political office. He is making his campaign before the people upon his record as councilman for the past two years, and upon the record made by the city council of which he is a member. He invites criticism and investigation of his record as councilman, and the Republican party asks a thorough investigation of the record made by the present council.

THE LOGIC OF EVENTS.

The Bryanites are now claiming that it is all a mistake; that they never said that wheat and silver were joined together by a divine law, wheat going up or down in the price movement with silver. But the facts are against them. In the early part of last year Congressman Towne, of Minnesota, elected as a Republican, made a speech in Congress that made a sensation, so forcible and apparently conclusive were its arguments in favor of free coinage of silver at 16 to 1 ratio. This speech was circulated by the millions during the campaign by the silver committees. In this speech, by the most elaborate use of statistics and charts, Mr. Towne endeavored to prove:

1. That beginning with 1873, there had been an unexampled fall in the prices of commodities.

2. That there had been during the same period a practically parallel fall in the price of silver.

3. That this "fall in prices" had been the result of the so-called "demonetization of silver;" and, therefore, that "remonetization" of silver would "restore prices" to their former level.

Silver, it was asserted, was bound to go down until remonetized, and wheat was bound to go with it. To such an extent was this argument carried that the old time-honored law of supply and demand was set aside by these modern theorists, and the price of the farmer's commodities was made to rest solely with wheat. Bryan and his followers had smooth sailing until the latter part of 1896. The alleged twins, wheat and silver, apparently fluctuated together until the 1st of September, 1896, on which date a bushel of wheat was exactly equivalent to an ounce of uncoined silver, each being worth just 67 1/2-10 cents. But on that date they parted. Wheat began to rise and silver to fall. This divergence of wheat and silver became noticeable before the election and had great weight in disproving the one great argument of Bryan and his followers.

By Sept. 26 there was ten cents difference, silver being 66 cents and wheat 76 cents. On October 21 wheat brought 82 1/2 cents and silver only 63 1/2. This increasing difference continued for just one year, when wheat touched \$1.03 and silver 51 1/2 cents, a bushel of wheat being equivalent to two ounces of bar silver. Since Sept. 1 wheat has fallen and silver has risen a few cents.

It is no wonder that ex-Senator Blackburn ignored the wheat and silver argument in his recent speech here, and that Bryan is trying to forget that he used the now exploded argument last year. In view of these facts, it is in order for the silver people to bring out another horse or to abandon the race.

THE DROUTH BROKEN.

Welcome Showers Came Last Night.

The first rain to fall for over sixty days came last evening to gladden the hearts of thousands of anxious people both in the city and country. It was only a shower, it is true, but a shower was better than nothing.

The first rain hardly sufficed to settle the dust, but during the night there were other showers, which was amply sufficient to somewhat dampen every thing.

Farmers were happy today because the dry spell is broken, and because the indications are for more rain. There was a larger downpour in surrounding districts than here, according to reports, especially in Illinois.

Beware of Objections to Catechism That Contain Mercury.

A mercury will surely destroy the sense of smell and completely organize the whole system when entering it through the mucous membrane. Such articles should never be used, as they are liable to cause the loss of the sense of smell.

METROPOLITAN OPERA COMPANY

Reorganizes Here.—Began Rehearsals at Cecilia Hall.

Starts on the Road Again in a Few Days.

The Metropolitan Operatic Specialty Company began rehearsals this morning at Cecilia Hall, at Fifth and Broadway, preparatory to again the road.

The company will include sixteen people, eleven of whom are now in the city at the Palmer House, having come here one week ago. The company started on the road as the Metropolitan Opera Company, and opened many opera houses in the south, being originally composed of thirty-six people, but through bad business management and the effects of the Yellow fever, which necessitated the abandonment of Southern dates, it went to pieces at Memphis, eleven of the company came here to the American Operatic Specialty Company and gave three concerts at La Belle Park.

Since then, through the efforts of Business Manager Frank R. Harty and Manager Raymond Stephens, good financial backing has been secured, and the company resumes the road with good prospects of a successful tour. It will hereafter play quarterly exclusively.

Mr. Stephens, the tenor, will be manager and Mr. Harty business manager. The company goes from here to Metropolis, thence to Cadiz, Ky. Mr. Stephens returned yesterday from Metropolis, where he secured new people.

OUGH TO BE TEMPERATE.

Trouble That Occurred Over a Can of Beer.

More beer is what Mary Schroeder, colored, wanted Saturday night, but Al Hall, the colored man for whom she keeps house, objected, because, he said, she had had one can.

She attempted to go after it anyhow, and in trying to keep her in home such a commotion was created that officers were called and arrested them. They were fined \$5 and costs.

Paducah May Get It.

Paducah may secure the next annual convention of Kentucky Bankers, as it is to be held in Southern Kentucky. The committee on arrangements has in consideration the cities of Paducah, Hopkinsville, Owensboro and Bowling Green. Louisville had the convention last year, and Paducah bankers will exert every effort to have their Kentucky collaborators come here next year.

Yellow Jack Killed.

Cuscuta's, Candy Catharine kills Yellow Jack wherever they find him. No one who takes Cuscuta's regularly and systematically is in danger from the dreadful disease. Cuscuta's kills Yellow fever germs in the bowels and prevents new ones from breeding 10c, 25c, 50c, all druggists.

DR. GOLDSTEIN.

The Optic Specialist Will Remain a Few Days Longer to Give Those Who Have Not Consulted Him an Opportunity to Call On Him.

Eyesight is priceless, and the popular opinion that the use of glasses should be postponed as long as possible is erroneous. As soon as unpleasant feeling denotes approach of failing sight glasses should be resorted to at once, as the longer the eyes are deprived of the aid which they need, and consequently subject to strain, the more rapidly will the changes as the eye becomes developed. The market is flooded with low priced spectacles which have imperfect lenses, are therefore a great injury to the eye. The important part of a pair of spectacles is the part comprising the frames, and naturally of most importance are the lenses they contain. His glasses are fitted with the finest spherical convex and concave lenses, accurately measured and properly adjusted to the frame, preventing irritation and strain to the eye. There is a great public need for information regarding the proper selection of spectacles and care of the eyes. A large proportion of habitual weak eyesight may be entirely remedied by the use of a carefully adjusted glass to assist the sight and thereby remove the undue strain to which the eyes under certain conditions are subjected. Those whose eyes are in a condition of perfect health will fail to understand adequately the stress laid upon apparently trivial matters in the preceding remarks; but those who have suffered from any defect for weakness of the eyes will comprehend at once the great importance of the seemingly most insignificant point mentioned. The former class of individuals, however, should have quite as much interest in the matter as the latter, for the old proverb that "an ounce of prevention is worth a pound of cure" can find no more fit application than in the case of the eyes.

Dr. Goldstein comes to us highly recommended and refers with pride to his successful work in Hopkinsville and other neighboring towns. His office is at the Palmer House, and office hours from 10 a. m. to 3 p. m. Consultation and examination free.

That Chill Never Came Back.

It never will if you use Dr. Bell's Peppermint Chill Tonic.
